

MAY QUESTIONS CLERK VOTE

Endurance Fliers In Forced Landing After Motor Fails

Manager Says Lack of Funds Forced Pilots to Come Down

UP NEARLY 27 DAYS

Several On Field When Plane Suddenly Comes Down to Earth

ST. LOUIS, Aug. 18.—(AP)—Dale Jackson and Forest O'Brien, endurance fliers, landed at 6:39:30 a. m. Sunday, after being in the air 647 hours, 28 minutes and 30 seconds.

Motor trouble and oil leakage caused the pilots, Dale (Red) Jackson and Forest O'Brien, to unexpectedly end their long grind. The motor had been missing and the fliers said they thought there was a crack in the crank case.

A preliminary inspection by mechanics yesterday failed to reveal any crack in the crank case or to accurately determine the cause of the trouble. The plane and the fliers were badly smeared with oil.

The sudden descent startled a crowd of about 500 sleepy-eyed observers, including cameramen and reporters who had been sleeping on improvised beds on the field for several days. The fliers had landed the ground crew a few minutes before the landing that they were coming down.

O'Brien was at the controls as the plane swooped down on an easy landing and taxied to a hangar. It was several minutes before the dazed crowd could fully realize what had occurred and there was only a flutter of a demonstration, contrasted with the wild scene staged on the same field in July, 1929, when the same fliers landed with a 420 hour record with 25,920 looking on.

Deciding it would be impossible to make repairs, the fliers waited until their fuel ran low and then came down. The crowd was orderly and the fliers were quickly whisked away to a downtown hotel where, after breakfast, the first thing they asked for was to be given haircuts. This done, they retired for a few hours of rest before receiving interviews.

Jackson and O'Brien had hoped to set a 1000 hour record. The mark they did establish is 93 hours, 47 minutes better than the previous record set last July 4 in the City of Chicago at Chicago by Kenneth and John Hunter.

The Greater St. Louis fliers were up almost exactly 27 days, or one day short of rounding out four weeks. The flight started at 7:11 a. m. July 21.

The flight was made in the same type of plane, a Curtis-Robin monoplane with a Challenger engine, as they used in their previous record flight in the St. Louis Robin. That flight started July 13, 1929, and ended the following July 30, the fliers having been called down by the flight sponsors.

Student Fliers Crash Today in Air

Two Youths Killed As Planes Crash Above Flying Field

SAN ANTONIO, Texas, Aug. 18.—(AP)—Two student fliers from Kelly Field Air College met their death in an aerial collision, while making a stunt maneuver near the school this morning. The planes which they were flying were only about 200 feet in the air.

They were Donald DeWitt Campbell, son of Mr. and Mrs. G. C. Campbell of Anadarko, Okla., and Cadet Robert Lee Scott, 23, son of Mr. and Mrs. Hugh Scott of Bethany, Okla.

National Guard Begin Training

Sixty Five Officers and Sixteen Hundred Enlisted Men Report

LITTLE ROCK, Aug. 18.—(AP)—A score of units of the 153rd Infantry, Arkansas National Guard, consisting of 65 officers and approximately 1200 enlisted men began their annual summer training at Camp McRae, near Little Rock today.

Most all the units came to the camp Sunday. Today is being spent in arranging the camp and in close order drill.

Combatant units will start target drill at once.

A regimental parade is scheduled to take place late this afternoon.

Growing Up

They used to call Nathalia Crane, of New York, a "child poet," but she's growing up now, as this picture shows. Nathalia, who won fame some years ago, is now 17. Recently she announced the completion of a modern epic poem in which the heroine, an Indian maiden, quells a Red uprising by sending her red-skin warriors after the Communists.

Bulletins

NEW ORLEANS, Aug. 18.—(AP)—The Robert E. Lee, Jr., 17-foot boat with an automobile motor started its race up the Mississippi river at 9:01 this morning in an effort to lower the river record between New Orleans and St. Louis.

OKLAHOMA CITY, Aug. 18.—(AP)—Houser No. 2 oil well which has been running wild, endangering property and lives has been quieted. The flow was shut off by pumping cement into the whole from the bottom.

DeQueen Officers Search For Killer

Alleged to Have Killed Aged Man and Wounded Estranged Wife

DEQUEEN, Aug. 18.—(AP)—Authorities started a search today for Ernest (Mack) Arnold, 35, after he was reported to have shot and killed John Smith, 70, and seriously wounded his estranged wife, Mrs. Hannon Arnold at the Smith home.

Mrs. Arnold is quoted as saying that Arnold opened fire on Smith without any warning.

The woman has been making her home with the Smiths for about four weeks or since she and her husband have been estranged.

Young Wife's Body Found In Forest

Husband of Norwood, Mass., Woman Sought After Body Is Found

WALPOLE, Mass., Aug. 18.—(AP)—The body of Mrs. Gladys Zwicker, 22, of Norwood, Mass., who disappeared with her husband last Friday, was found in the woods here Sunday. She had been shot in the head. Police started a search for the husband.

Jerome Zwicker, 22, the woman's husband left home with her, after he took a revolver from the apartment of his brother-in-law, police said. Fear for the safety of Mrs. Zwicker first was expressed on Saturday morning when her automobile was found abandoned at Boston.

A small white dog which had followed his mistress to her death and stood guard over her during the time she lay in the woods, led to the discovery when his barking was heard by a passerby.

The fact that the automobile was found near the docks in Boston led police to believe Zwicker had shipped on a boat. A wireless message to a ship which left for Savannah Friday afternoon elicited the information that Zwicker was not aboard.

Mrs. Zwicker was an expectant mother.

Good Beet Prospects

LOVEAND, Colo., Aug. 18.—(UP)—Prospects for the beet crop in the Loveland district this year are brighter than last season. It is estimated the crop will be worth \$1,200,000.

Rain Reported Over Most All Arkansas Saturday-Sunday

Many Sections Report Enough Moisture For Fall Gardens

SOME RELIEF SEEN

Clarksville's Reported Water Shortage Said to Be Relieved

LITTLE ROCK, Aug. 18.—(AP)—Rain-fall from heavy to moderate was reported to have fallen Sunday and Sunday night in most parts of the state of Arkansas, and that most sections have reported drought conditions somewhat relieved.

Several parts of the north and north central parts of the state reported rains of from three to more inches. Most of the sections visited by the rains said by the farmers to have sufficient moisture to insure fall gardens and late crops.

A section about 125 miles in width running through the state, that has had the greatest struggle during the drought has been greatly benefited. Hot Springs reported a heavy rain this morning and Clarksville where serious shortage of the towns water supply has been felt, has had a good rain and the seriousness relieved.

Bebe, located in the truck growing section had a heavy rain Sunday thus insuring some fall crops. McRae and Heber Springs both reported a good drenching yesterday.

In Newton and adjoining counties and in the Kessett section rainfall of one to three and one-half inches was reported.

The southeast section of the state also has reported a severe wind and lots of rain which fell Saturday in the vicinity of Lake Village.

Light rainfall has been reported over most sections of the state within the past 48 hours, including Little Rock.

Severe reported 4.97 inches of rainfall and Georgetown 3.40 inches Sunday.

Vetch About Best Soil Building Crop

Hempstead Farmers Urged to Plant an Acreage of This Crop

However unwelcome it is the present drought has in many instances been a great lesson to many of our farmers. Reports from all over the State show that crops which followed vetch are holding up much better under present dry weather conditions, according to Grover C. Kincaid, assistant county agent. This is, of course, due to several changes in physical structure of the soil brought about by growing vetch.

Since vetch is one of the leading winter legumes adapted to this section of the State wherever it is grown there is added to the soil an abundance of nitrogen and organic matter. The nitrogen furnished to the soil by vetch is the same element which is furnished by Soda, Sulphate of Ammonia, etc., thereby reducing commercial fertilizer requirements to the soil. The value of organic matter supplied by vetch lies partially in the beneficial effects to the physical structure of the soil. The soil, when vetch is turned under and is decayed, becomes more similar to a sponge and absorbs early spring rains thereby storing up a supply of moisture for the summer months.

It is hoped that wherever possible and as soon as sufficient rainfall has had, each farmer in Hempstead county will plant vetch on all land which is not planted to a drought emergency crop of Abuzzi rye or oats this fall. That farmers of Arkansas are more fully realizing the value of vetch is shown by the fact that in 1929 the acreage of vetch more than doubled the 3750 acreage of 1928.

Search Made For Negro in Oil Field

Alleged to Have Stabbed White Man in Quarrel Over a Match

EL DORADO, Aug. 18.—(AP)—Deputy sheriffs were searching the oil field sections today in an effort to locate an unidentified negro who last night stabbed R. C. Hardage, an oil company employee. Hardage was not seriously wounded.

Officers were told that the stabbing was the outgrowth of an argument which started when Hardage asked the negro for a match.

Hoover and Governor's Map Drought Relief

President Hoover is shown here in company with governors, or their representatives, of the 13 states hardest hit by the nation's big drought as they completed plans for relief in the parched areas through formation of special federal, state and county agencies. Loans and reduced railroad rates are among the main points in the relief program.

Left to right, are: Governor William C. Conley, West Virginia; Governor John E. Erickson, Montana; Governor Arthur J. Weaver, Nebraska; Governor Harry G. Leslie, Indiana; President Hoover; Senator J. M. Robinson of Kentucky, representing Governor Flem D. Sampson; Governor Henry C. Caulfield, Missouri; Harvey T. Harrison, Arkansas, representing Governor Harvey Parnell; Governor Clyde M. Reed, Kansas; Governor John Hamill, Iowa; Governor Myers Y. Cooper, Ohio; State Commissioner of Agriculture W. J. Fitts, representing Governor Horton, Tennessee; Governor John G. Pollard, Virginia, and Governor Louis L. Emmerson, Illinois.

Melon Photos Get Great Publicity

Iowa, Kansas Missouri Shippers Display Hope Champion's Picture

Returns are being received on the complimentary enlarged pictures of the 1929 champion watermelon, 25 copies of which were sent to prominent produce commission firms in the North and Middle West.

The pictures, enlarged and framed to make a handsome memorial to the 1929 Watermelon Festival, were crated and sent out by express to a select list of big dealers in melons and other truck produce. This list was compiled jointly by Hope's four truck produce shippers, and represents some of the leading national distributors of truck produce, including Hempstead county's famous watermelons.

Some of the letters already received by L. Carter Johnson, of the publicity and advertising committee of the 1930 Watermelon Festival follow: "Des Moines, Iowa, Aug. 6.—It was very nice of you gentlemen to remember us and you may rest assured that this picture will have a most prominent place on the wall of the writer's office. We also hope to have the pleasure of seeing you or at least some of your members in Des Moines in the not far distant future. It would be indeed a pleasure to entertain you. ELWOOD H. ROYER & CO."

"Salina, Kan., Aug. 7.—Yours of the 2nd received, also enlarged photo of the world's largest watermelon, and assure you this picture will occupy a conspicuous place in our office. MIDWEST BROKERAGE CO."

"St. Louis, Mo., Aug. 5.—Received the beautiful picture you sent us, and we have found a place for it in our office. Want to thank you for same. H. J. SELLMEYER PRODUCE CO."

"Weibita, Kan., Aug. 6.—This acknowledges the receipt of a picture of the world's largest watermelon, and for which please accept my thanks. O. T. HAMILTON, BROKER."

Deny Opposition To Herbert Hoover

Claim That Statements to This Effect Were Untrue

ATLANTA, Ga., Aug. 18.—(AP)—J. W. Arnold, chairman of a factional Georgia state Republican Central Committee, issued a statement yesterday denying the charge that he had organized a meeting here Saturday and adopted a resolution repudiating the interpretation placed by newspapers on the actions of the body at its organization meeting two weeks ago in Savannah.

At the Savannah meeting resolutions were adopted severely criticizing the administration of Postmaster General Brown which are handling several Southern states business normally transacted by the state organizations.

The statement said newspapers accounts of the Savannah meetings had designated members of the organization as "bolters," had made up an independent party, and had indicated the organization was opposed to President Hoover and his policies. It declared these interpretations to be "untrue and without any foundation of fact whatsoever."

Recount Is Denied May Who Says He Leads By 1 Vote

County Central Committee Stands By 4-Vote Decision For Anderson

ACTION UNCERTAIN

Further Contest Would Have to Be Carried to Circuit Court

NOTICE TO CANDIDATES

Several errors in box returns and total tabulations appeared in the official count of the Democratic Central Committee, reported in The Star last Saturday.

While the outcome of no races is affected by these errors, The Star is endeavoring to rectify the official tabulations of which Saturday's boxed report was a copy, and the newspaper will repeat the publication, possibly Tuesday.

Returns on the township races were still unavailable Monday, but have been promised for publication Tuesday.

Another chapter was added today to the dispute over the election for county and probate clerk when Frank May, incumbent whom the Democratic County Central Committee ruled was defeated by Arthur C. Anderson on a recount of the official tabulation Friday, went before the committee and asked for a second recount.

The recount last Friday put Anderson four votes ahead. May today said an error had been discovered which put him one vote ahead of Anderson.

A second recount was denied, however, at a meeting of the county central committee today at Washington with Stuart Monroe presiding.

Mr. May, questioned today by The Star, said he was undecided what action to take. The only course for a candidate denied relief by the central committee is to petition the circuit court for an order demanding a recount, and it was not certain today whether Mr. May would take this action.

Committee's Count  
The central committee last Friday reported the vote for county clerk, following a recount demanded by Anderson, to be as follows:

Anderson ..... 1,485  
May ..... 1,481

On complete unofficial returns excepting the absentee list, last Wednesday, Anderson was 27 votes ahead. With the tabulation of the absentee list at Washington Friday noon, May went into the lead by eight votes. Anderson demanded a recount, and was declared the winner by four votes.

Today's declaration by May threw the entire election into uncertainty once more, with practically a week elapsed since the voters went to the polls.

Delegates Elected  
The meeting of the central committee was opened by Otis Johnson, past chairman and Stuart Monroe was named temporary chairman. New officers of the committee are: W. S. Atkins, chairman, succeeding Mr. Johnson; and W. Homer Pigg, secretary, succeeding W. H. Etter.

The committee elected the following delegates and alternates to the state, congressional senatorial and judicial conventions:

Delegates: W. S. Atkins, Luther Higginson, I. L. Pilkinton, Aubrey Lewis, H. J. Lemley, J. S. Wilson, J. L. Wilson, Alva Williams.

Alternates: Ed VanSickle, C. Cook, C. C. Stuart, Otis Johnson, Wash. Hutson, D. H. McLenore, John Riggall, Shirley Robins.

Coste Forced to Postpone Flight Across Ocean

LE BOURGET, France, Aug. 18.—(AP)—Captain Coste, of France's foremost aviator, landed here Sunday evening ready for a start at dawn on a transatlantic flight to New York, but late Sunday evening was obliged by adverse weather conditions along the French sea coast to postpone his attempt.

Quachita County Farmer Injured in Auto Mishap

CAMDEN, Ark., Aug. 18.—(AP)—John Yarbrough, 60-year-old Quachita county farmer, was seriously injured in an automobile accident here Saturday. He was struck by a truck driven by Homer White, who was taken into custody pending the outcome of Yarbrough's injury. Yarbrough suffered a badly crushed right leg and severe head injuries.

Arkansas Dies In Automobile Crash

EL DORADO, Aug. 18.—(AP)—Clarence Fuller, 45, was killed and Carroll Thompson was slightly injured late Sunday in an automobile accident on the highway to Strong south of here. Fuller, thought to be a resident of Camden, was instantly killed when the car hit a small bridge and careened across the small creek into a tree. Thompson's injuries consisted chiefly of a hurt shoulder.

Mill Workers Walk Out Early Today

BESSEMER CITY, N. C., Aug. 18.—(AP)—Approximately 1500 employees of the American Mills numbers One and Two, went out on a strike today in protest to a proposed wage cut.

E. L. Gillespie, spokesman of the strikers said, "This walkout has no union affiliation with the union and has no connection with Communism."

The mills are the property of Max and Frank Goldberg of Gastonia. A meeting was held in the public park at Bessemer City Sunday at which an agreement for the walk out was made. The proposed wage cut would amount to 20 or 30 per cent of the wages Mr. Gillespie said.

Chief of Police Sam Hoyle of Bessemer City said that everything was quiet and there was no disorder in the town among the mill workers.

Three Men Charged With Murder Plot

JACKSONVILLE, Fla., Aug. 18.—(AP)—Three men are under bond charged with a serious crime.

The men are Fred O. Eberhardt, publisher of the Tallahassee (Fla.) State News; Frank Ralls and Henry Halseman, both of Jacksonville, charged with "conspiracy to procure the assassination of Gov. Doyle E. Carlton."

Eberhardt and Ralls were arrested at a hotel. Halseman was arrested at home. The sheriff said he also seized about 40 gallons of liquor at the Halseman residence.

The sheriff said the arrests were the results of several days' investigations. He declined to give details of the investigation.

Reports were current that various angles of the case had been laid before the Department of Justice at Washington and that secret service agents had started an investigation. Sheriff Carlton neither would deny or confirm the reports.

Eberhardt's newspaper has waged an editorial campaign against the Carlton administration since the governor took office in January, 1929. The editor also was in the line of late winter when he threatened to enjoin horse race tracks from operating in Florida, alleging that gambling persisted in violation to the state law and that such tracks were "public nuisances."

Halseman is connected with a local real estate company bearing his name while Ralls has been active in Duval county politics.

At the trial this morning J. C. Matison, Justice of the Peace, set the bonds of the three at \$500 each. He said that under the Florida law such cases are termed misdemeanors and that upon conviction the punishment is one year in the penitentiary.

All three of the bonds were made immediately by attorneys of the men.

Local Man Finds Thief Stealing Eggs

Many discussions arise as to whether snakes lay eggs or whether they give birth to their young alive. Dr. Ortenburger says. Actually both sides are correct, because some snakes lay eggs, and some do not—Swiped.

Which causes us to say that snakes eat eggs. For example when John Owen, who has a flock of chickens at the Southwest Arkansas Fair Grounds, went to gather up the eggs Sunday afternoon he found a large chicken snake coiled in one of the hen's nest. He had swallowed all the eggs, including a dooey knob which had been used as a nest egg.

Thief Had Included Door Knob Among Nest Of Eggs

Harper's body was found last Thursday about twenty-five feet from his home at Dermott, with his skull fractured and a large amount of money which he was known to have had missing.

Harvey and another negro by the name of Joe Blakely, who is also held, were arrested soon after the body was discovered. Harvey confessed and implicated Blakely. The two were arrested at the home of a friend and officers said they were in the act of counting the money when arrested, the amount of which was about \$2000.

Two Burned to Death When Airplane Crashes

ANNAPOLIS, Md., Aug. 18.—(AP)—Two men were burned to death late Sunday when an airplane in which they were passengers fell at Lipson Corners, between here and Baltimore, and was destroyed by fire. The pilot was brought in a critical condition to a hospital here.

The dead are James Rupert of Jessups, Md., and Francis Beal of Dorsey Station, Md. The pilot is Marshall Talbott, 21. The accident occurred at a small commercial airport.

The owner of the plane told authorities the craft, as well as the pilot, was unlicensed.

Arkansas Dies In Automobile Crash

EL DORADO, Aug. 18.—(AP)—Clarence Fuller, 45, was killed and Carroll Thompson was slightly injured late Sunday in an automobile accident on the highway to Strong south of here. Fuller, thought to be a resident of Camden, was instantly killed when the car hit a small bridge and careened across the small creek into a tree. Thompson's injuries consisted chiefly of a hurt shoulder.

# Hope Star

Published every week-day afternoon by STAR PUBLISHING CO.  
C. E. Palmer & Alex. H. Washburn, at 411 South Main street, Hope, Ark.

C. E. PALMER, President  
ALEX. H. WASHBURN, Editor and Publisher

Entered as second-class matter at the postoffice at Hope, Arkansas under the Act of March 3, 1879.

Member of The Associated Press. The Associated Press is exclusively entitled to the use for publication of all news dispatches credited to it or otherwise credited in this paper and also the local news published herein. All rights of reproduction of special dispatches herein are also reserved.

Subscription Rates (Always Payable in Advance): By city carrier, per month \$1.00; six months \$5.00; one year \$9.00. By mail, in Memphis, Nevada, Nevada, Miller and Lafayette counties, \$10.00 per year, elsewhere \$12.00.

The newspaper is an institution developed by modern civilization to present the news of the day, to foster commerce and industry, thru widely distributed advertisements, and to furnish that check upon government which no constitution has ever been able to provide.—Col. R. R. McCormick.

## The Star's Platform

### CITY

Apply the revenues of the municipal power plant to develop the industrial and social resources of Hope.  
More city government in 1937, and improved sanitary conditions in the alleys and business back-ways.  
Support the Chamber of Commerce.

### COUNTY

A county highway program providing for the construction of a minimum amount of all-weather road each year, to gradually reduce the dirt road mileage.

Political and economic support for every scientific agricultural program which offers practical benefits to Hempstead county great industry.

Encourage farmer organizations, believing that co-operative effort is as practical in the country as it is in town.

### STATE

Continued progress on the state highway program.  
Favorable tax reform, and a more efficient government through the budget system of expenditures.  
Free Arkansas from the cattle tick.

## Youth—Then and Now

NOW AND then we regret the passing of the old swimming pool. We sigh a little for the blue-green waters that were so cool and refreshing when the sturdy bodies of little boys went plunging through them.

We talk about the truant days when children went far afield, farther and farther from the small red school house, until finally the echoes of its bell were lost down the long, sunny road.

Those who lived in the happy days have thrown a glamour across them. It is a long way down the memory-tangled road and they recall only the dramatic. Those who have not known them thrill to the unreal.

The chances are 10 to one, if a comparison could be made of those days and the present, we would discover that contemporary America is having an exceedingly good time in spite of the fact that its recreation is handed to it on a silver platter, whereas its fathers had to go dig for theirs.

DURING the month of August the city streets are lined with children's parades in many cities. Gaily and contentedly the children march, showing specimens of the handiwork which they have made at summer playgrounds; showing off their pets, which are caged like those of a regular circus; singing songs, and now and then masquerading like the trapeze performers and clowns of the circuses which have come on gala days.

They seem to be enjoying life quite as much as their fathers did. Maybe it is because they have never tasted forbidden fruit that they are satisfied. They have never had to slip away from a geography class to climb a tree and watch the sky and think long, long thoughts. They are taken on botany excursions and encouraged to scale the heights.

They have never had to slip out of the house when no one was looking, to join the gang diving at the mill pond. The playground provides supervised swimming every day.

TODAY'S plan is much wiser and more sensible, of course. Approved play is very helpful and enjoyable. None will dispute that.

But that old, divine thrill of knowing you were doing something on your own was worth a couple of supervised hours. It gave a boy a feeling of importance. Of being a little bit daring of approaching the blissful stage of manhood when he could swim at any hour and climb any tree without being reproved.

Forbidden fruit, even the harmless kind, is always sweeter.

We have no fault to find with the modern system. It is developing stronger, healthier boys and girls. It puts its approval on the natural activities of youth instead of making children have to act as culprits who should be ashamed of their exuberance.

But there is a little of the romance of adventure that the tamer order doesn't have, somehow.

## Advertising a Farm Product

AMONG the important agricultural activities in the section of Southern Arkansas of which the city of Hope is the marketing center is that of raising watermelons. So great has this industry become that about two dozen experienced cutters were used to slice them for the numerous celebrants weighed in the neighborhood of 100 pounds each. Souvenir postals, which were distributed by the community, depicted one giant melon weighing 152 pounds, said to be the largest product of the sort ever produced.

Through this annual festival, Hope, Ark., is gaining a profitable reputation. Its melons are becoming famous, and the industry they represent is steadily expanding, which means lots of money put in circulation among the growers, and also among the business circles of the city.

Demonstrations of this kind bring out a community's pride, and at the same time afford very helpful advertising. —Shreveport Journal.

Governor Parnell was unable to attend the "drought conference" called by President Hoover, but sent a man in his place. The governor had a conference of his own to look after in Arkansas.

Any crack about the weather from now on must come under the heading of dry humor.

## Plenty "Employment" Guaranteed for This Party, Anyhow!

## NCE, UPON A TIME.

Homer Croy, noted author, who wrote "R. F. D. No. 3" and "West of the Water Tower," pitched hay on his father's farm to get enough money to buy a typewriter and pay his railroad fare to New York.

Movie Producer—So you say you have played opposite John Barrymore? Applicant—Yes. Our studio was right across the street from where he worked.

George—Yer ma give yer a spank in las night, didn't she? Freddie—Yeh, when a feller gits in trouble there's alius a woman in the case.—Ex.

## Daily WASHINGTON LETTER

BY RODNEY DUTCHER

NEA Service Writer

WASHINGTON.—This does not seem like the best of all possible worlds to Senator Hiram Johnson of California. In fact, it must appear to him a rather terrible place where all kinds of bad things happen and never anything nice.

Most lately Hiram has been bothered about the frightful peril in which his country has been placed by the London naval treaty and even after the thing was signed he was still growling loudly about it.

Then there's the Mooney-Billings case in California. Just about everyone has an opinion on the justice or injustice of the continued imprisonment of the two labor leaders—except Hiram. All these long years he hasn't had a thing to say about this world-famous case in his own state and of course at a time when everyone else is getting excited about it silence is rather embarrassing.

It Never Rains—It Pours

But these little irritations are only the latest in the series of large or petty griefs which have been afflicting Johnson for the past decade. Since the League of Nations fight, when Johnson acquitted himself well, nearly everything has gone wrong in one way or another and he has often sunk into the depths of resentful misery.

Fondly and confidently, Johnson anticipated the presidential nomination in 1920, which everyone knew was equivalent to election. His failure to land it after the Wood-Lowden deadlock was broken seemed to be a crushing blow. They offered him the vice-presidential nomination during his rage and he spurned it, not knowing that he was spurning the presidency itself. He had been an able, progressive,

liberal leader, nationally popular. But after that he was just a California senator and his only big piece of work these last 16 years has been his able, successful chairmanship of Boulder Dam in the interests of his home state.

After 1920, La Follette, Borah, Norris and Kenyon kept fighting progressive causes with more vigor than ever, but Johnson never got back into the front ranks. He made futile onslaughts on the Colombian treaty and the Four-Power naval pact, but when a real hot progressive fight came in the Newberry case Hiram wasn't there to cast a vote.

Lost Again in 1924

He had been the only progressive since 1912 to come within striking distance of a major party nomination, but when in 1924 he decided to oppose Coolidge for the nomination he failed dismally—even to carry California in the primaries. It was never quite clear just what Hiram was campaigning about, although he attacked the League of Nations quite bitterly. The only result of his candidacy was to cut down his patronage to nothing or next to nothing during the Coolidge reign.

Hiram and Herbert Hoover had been old political enemies. The former had snubbed the present president under in the California primaries of 1920 and each disliked the other. But it was Johnson who, in the period of his decline, had to watch the steady rise of his enemy. By 1928 Johnson was in no position to oppose Hoover in California or elsewhere. An agreement was reached whereby Johnson would go along for Hoover if the Hoover forces would not oppose him for the senatorial renomination. Hiram gritted his teeth and bore it, but he did not grin.

## Dog's Trick Wins Back Old Home

KNOXVILLE, Tenn., Aug. 16.—(UP)—If you love dogs, here's one for you. Mike was a bird dog, valued at \$300. N. K. Peterson was the owner. Then Mike was lost for 15 months. Peterson ultimately saw the dog in company of I. S. Bentley, who insisted the dog was his "brought it from a negro." Peterson brought a replevin action and convinced Squire John Myatt of his right to ownership when he made Mike sit up on the rear seat of an automobile in a manner designed to keep the cushion clean despite dirty feet. It was an old trick Peterson had taught the dog. The negro said he had found the dog.

## HARMONY

The rain which came Monday was sure appreciated in this community. Mr. and Mrs. Willie Hodness spent the week end with Mr. and Mrs. Sammy Hodnett of this place.

Mrs. Emma Ebling and children from Saratoga were week end visitors with relatives of this community.

Mr. and Mrs. George McMillen and P. P. Ottwell and son were visitors in Hope Monday.

Miss Bessie McMillen spent Friday with Mrs. Ella Hodnett.

Mrs. Nellie Leach and son, Mr. Leo Farmer spent the week end with Mr. and Mrs. Joe Daugherty of Harmony.

Curtis Daugherty and Woodrow Ward both of Patmos called too see Louie Richardson of this place one day last week.

Mrs. Jennie Matney who has been visiting in this community has returned to her home in Saratoga.

Mr. and Mrs. George McMillen and children, Herman, Lloyd, J. D. and Howard spent Friday with Mr. and Mrs. Jess Kennedy of Grange Hall.

Mrs. Emma Ebling and Miss Bessie McMillen called to see Mrs. Violet Daugherty Sunday afternoon.

## Pipton Welcomed in New York

Back in this country for his fifth attempt to win the America's Cup, symbol of international yachting supremacy, Sir Thomas Lipton here is shown, left, with New York's welcome, Grover Whelan, as he was officially received. The gallant old sportsman, who has spent several millions in trying to capture "The Old Mug," received an enthusiastic ovation upon his arrival.

## BARBS

The 125th anniversary of the discovery of the hot dog is being celebrated in Vienna. With much relish, of course.

Sales of electricity in England have increased 150 per cent in the last seven years.

The largest garage in Europe has been built at Stockholm. It will accommodate 1,500 cars.

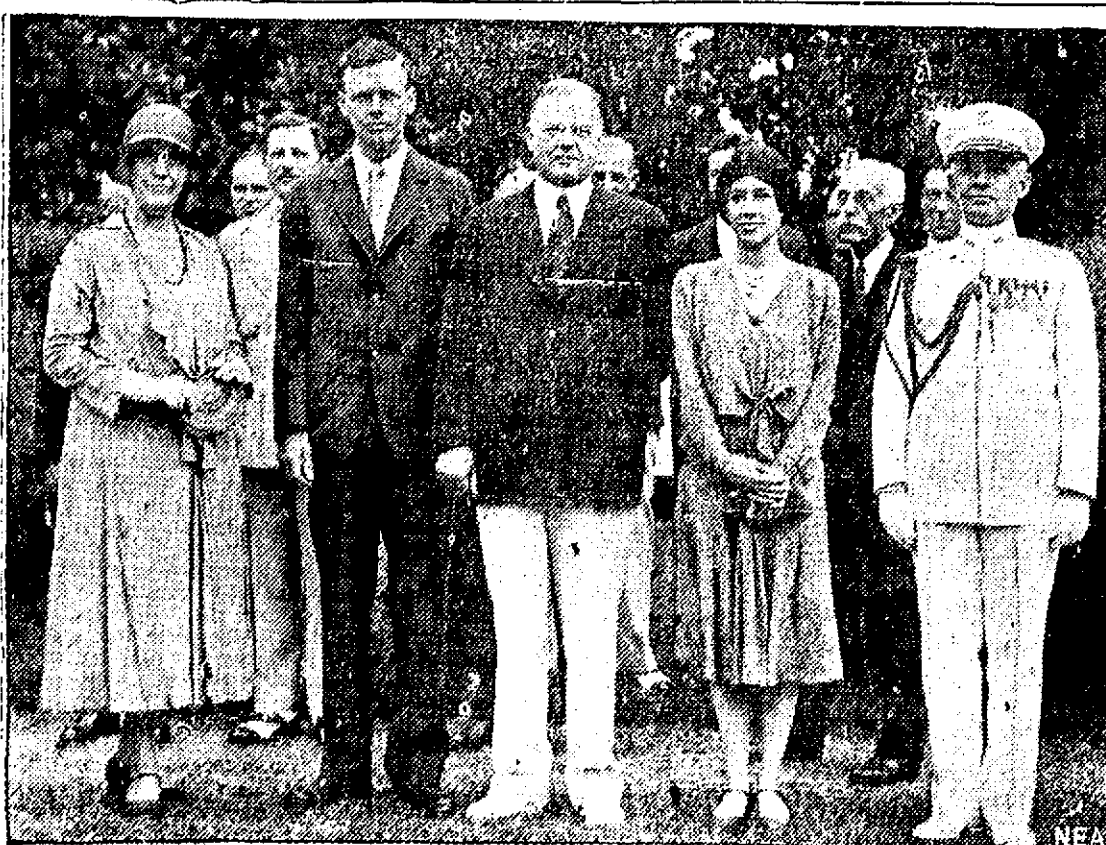

sentiment among detectives who are thought to have a monopoly on the method.

Nobody in Scotland, says the American consul in Glasgow, wants to migrate to the United States although a year ago 33,000 sought entry. Most of them, perhaps, have saved up, but are waiting for that rainy day.

Moron—Oh, I just hit my crazy bone.  
Robot—That's too bad. Let me hold my hand on your head.

Western Tourist—Those Indians have a blood-curdling yell.  
Guide—Yes, ma'am, every one of 'em is a college graduate.—Ex.

## Lindy Honored Anew at White House Ceremony

Another official honor from the nation was conferred upon Col. Charles A. Lindbergh at the ceremony pictured above on the White House lawn in Washington. It was a special Congressional medal, awarded "in commemoration of his achievements in aviation." Shown left to right are Mrs. Hoover, Colonel Lindbergh, President Hoover, Mrs. Lindbergh, and Col. Campbell B. Hodges, White House military aide. Secretary of the Treasury Andrew Mellon may be seen standing behind Mrs. Lindbergh and Colonel Hodges.

## Daily Cross-word Puzzle

## "Let's Go Native" Now Showing at the Saenger

"Let's Go Native," the mad and merry melange of fun, frivolity and music now playing at the Saenger theatre presents what is believed to be the most imposing aggregation of Hollywood's younger comedy and music celebrities since "Paramount on Parade."

Jeanette MacDonald and James Hall play the romantic leads and sing two gorgeous songs, "My Mand Moment" and "It Seems To Be Spring." Jack Oakie and Skeets Gallagher provide much of the fun as a wayward taxi driver and a tropical island king respectively. Mr. Oakie sings three songs, "Joe Jazz," "Let's Go Native" and "I've Got a Yey for You."

Kay Francis is the assisting artist in the latter song. David Newell provides whatever menace one can find in such a bland and uproarious story as "Let's Go Native."

Then there are William Austin, Eugene Pallette, Charles Sellon and other clever comedy providers.

Axel—D'ja hear th' latest about Newrich.  
Hutt—Now. What about him?  
Axel—He bought a Louise XIV bed, but it was too small for him, so he sent it back and asked for a Lewis XVI.—Ex.

# SOCIETY

Mrs. Sid Henry Telephone 321

When I have time so many things I'll do  
To make life happier and more fair  
For those whose lives are crowded  
now with care.  
I'll help to life them from their low  
dispair,  
When I have time.

When I have time, the friends I love  
so well  
Shall know no more these weary, toil-  
ing days;  
I'll lead her feet in pleasant paths  
always,  
And cheer her heart with words of  
sweetest praise,  
When I have time.

Now is the time. Ah, friend, no long-  
er wait  
To scatter loving smiles and words  
of cheer  
To those around whose lives are now  
so dear;  
They may not meet you in the com-  
ing year—  
Now is the time.

Mr. and Mrs. George Robison and  
son, George, Jr., left yesterday after-  
noon for St. Louis and the Eastern  
markets where Mr. Robison will pur-  
chase fall stock for the George W.  
Robison & Co. stores.

The B. & P. W. club will meet to-  
morrow at 6 o'clock at Bridewell's  
lounge with Miss Hazel Arnold as host-  
ess.

Mrs. Preston Meek of Fort Smith is  
the house guest of her sister, Mrs.  
Talbot Field and Mr. Field.

Miss Martha Stroud spent yester-  
day visiting with friends in Texar-  
kana.

Mrs. E. T. Houk of Durant, Okla., is  
the house guest of Misses Callie and  
Sue Wesson.

Robert C. Walker of Tallulah, La.,  
was recent visitor in the home of his  
mother, Mrs. Henry Walker.

Miss Helen King Cannon has re-  
turned from an extended visit with  
her sister, Mrs. J. W. Holcomb in  
Galesburg, Ill.

Little Misses Mary Nell Carter, Jane  
Carter and Evelyn Brinary have re-  
turned from a few day's visiting with  
Misses Analee and Alice Newton in  
Little Rock.

Dr. J. A. Henry, E. C. Brown and  
Sid Henry made a business trip to  
Birmingham today.

Dr. and Mrs. W. C. Allison, Mr. and  
Mrs. Max Cox, Mr. and Mrs. Terrell  
Cornelius were week end guests of  
Mr. and Mrs. R. T. White at their  
cottage at the Little River Country  
club.

Mr. and Mrs. Billy Duckett and lit-  
tle son, William, Mrs. Dorsey McRae  
and Benford McRae have returned  
from a visit with Mr. and Mrs. J. C.  
Broyles in New York City, en route  
home they visited Washington, D. C.  
and other points of interest.

Mrs. John Vesey left this afternoon  
for Little Rock where she will serve  
as matron of honor in the wedding of

Miss Jewell Swain to Charles Efurth.  
The wedding will be solemnized Tues-  
day evening at 9 o'clock at Asbury  
Methodist church.

Miss Bessie Westmoreland of Tex-  
arkana spent yesterday visiting with  
Miss Elizabeth Arnett and other  
friends.

Mrs. John Green, who has been the  
guest of her mother, Mrs. Alice Mc-  
Math, and sister, Mrs. John McCabe  
for the past six weeks left yesterday  
for her home in Little Rock.

Mr. and Mrs. J. L. Jamison spent  
yesterday visiting with Mr. and Mrs.  
Gaines Anderson in Texarkana.

Miss Mary Hitt of Texarkana was  
the week end guest of Miss Mary Bell  
Marshall at the home of Miss Man-  
gie Pell on South Main street.

Mrs. Charles Burgess has return-  
ed home after a week's visit with  
relatives in Texarkana.

Miss Martha Ann Singleton has re-  
turned from a visit with relatives in  
Tallulah, La.

Misses Bess and Annie Jean Walker  
left yesterday to join the Fourth In-  
dustrial tour of the South Arkansas  
Chamber of Commerce. They will visit  
several noted resorts, including At-  
lantic City, Niagara Falls and Bat-  
tle Creek, Mich. Their itinerary also  
includes visits to the following cities:  
Cincinnati, Philadelphia, Indianapolis,  
New York, Washington, Chicago and  
Toronto, Canada.

Mrs. R. C. Walker and little daugh-  
ter, Barbara Sue of Tallulah, La., are  
guests of Misses Callie and Sue Wes-  
son and other relatives.

Miss Helen Hunter has returned  
from vacation spent in Hot Springs.

Elton Carpenter had as week end  
guests, Melvin Lawson, Howard Bow-  
man, John Abbott, Gerald Starnier  
and Byron Schriber all of Little Rock.

## New York Doctor Severely Beaten

## Three Assaults Waylay Victim as He Starts On Walk

NEW YORK, Aug. 18.—Three mys-  
terious assailants, after making a care-  
ful study of the personal habits of Dr.  
Julius Bloom, eminent "Bronx" nerve  
specialist, attacked him early Sunday  
and beat him so severely that he may  
die. Obviously informed that the doc-  
tor, who is 50, was going to go for a  
midnight stroll for an hour or so alone  
each night, the trio waylaid him at  
2 a. m. as he returned to his home.

While one waited at the wheel of a  
small automobile, his companions seized  
Bloom as he stepped into the foyer  
of the big apartment building. Rush-  
ing him into a corner of the entrance,  
they brought blackjacks down on his  
head, knocking him down.

Ms. Fanny Bloom, in her first floor  
apartment where the doctor also main-  
tains his office, heard her husband  
cry for help, calling her name. She  
awakened their 19-year-old son, Jo-  
seph, and he rushed into the foyer,  
as Albert Marshall, night elevator op-  
erator in the building, also rushed out.  
Thereupon the physician's assailants  
dashed out to their machine and sped off.

Dazed and bleeding from a fractur-  
ed skull and numerous gashes on his  
face, Dr. Bloom staggered into the  
lobby and collapsed. He still was con-  
scious, however, when medical aid  
reached him, but when pressed for a  
possible motive for the attack, he  
showed his head slowly and lapsed  
into unconsciousness.

Mrs. Bloom indicated that the doc-  
tor had been under surveillance by  
his assailants. On Friday she said a  
young man who did not identify him-  
self called at Dr. Bloom's office for a  
consultation. She informed him the  
doctor was absent and probably would  
not return for several hours, but he  
remained for a time, asking questions  
as to her husband's income and per-  
sonal activities. But to police she in-  
sisted that so far as she knew her  
husband had no enemies.

## Prelate Defends Birth Control

Startling modern conclusions were  
contained in the report of the Arch-  
bishop of Canterbury (Cosmo Lang)  
above, explaining the resolutions  
adopted by the conference of Angli-  
can bishops of the world held in Eng-  
land. The bishops voted to sanction  
birth control under certain closely  
stipulated conditions, to preach against  
war, to deal firmly with the divorce  
evil and to give women greater au-  
thority in the church.

## Chicago Doctor Is Accused As Quack

## Said to Have Been Me- chanic By Day and Surgeon at Night

CHICAGO, Aug. 18.—Robert E.  
Parks, general manager of the Des-  
plains Emergency hospital, is un-  
der arrest charged with violating the  
state medical laws. "Dr." Parks work-  
ed as an automobile mechanic by day  
and as a surgeon at night. His medical and surgical knowl-  
edge was gained while he was a  
trustee in the Bridewell hospital un-  
der a sentence on a statutory charge.

Later he managed to get on the  
staff of the United States Public  
Health Service hospital on the strength  
of a forged certificate from Rush  
Medical School. Then he opened an  
office as a physician and surgeon, dis-  
playing four forged certificates. When  
an investigation became too hot he  
disappeared for a time and the first  
clue the authorities had was when  
Paddy Harmon, builder of the Chicago  
stadium, was killed and his wife  
injured in an automobile accident.

They were taken to the Desplains  
hospital and "Dr." Park presented a  
bill for \$200 for services. Harmon's  
adopted son refused to pay when he  
learned Parks was not a qualified  
physician. He also notified state med-  
ical officials and Parks' arrest fol-  
lowed.

Within the last three weeks nine  
victims of automobile accidents have  
died in Parks' "hospital." In one in-  
stance he charged the relatives of a  
woman \$675, after telling them she  
would not live and asked that her  
body be turned over to an undertak-  
er friend of his.

When Paddy Harmon and his wife  
were taken into the place, Mrs. Har-  
mon was left lying on the floor from  
10 in the morning until 7 in the eve-  
ning and her hip wounds were not  
dressed, it was charged.

## Georgia Cow Sets Record

ATHENS, Ga., (A.)—Yielding 707.42  
pounds of butterfat and 15,490 pounds  
of milk, Raleigh's Zilla, Jersey cow  
owned by J. C. Woodbridge, has just  
completed the highest butterfat pro-  
duction record ever made by a 12-  
year-old cow in Georgia. The test  
covered a period of 265 days.

## Hawks Ends Record Flight

Across the United States in 12 hours and 25 minutes! His title of cross-  
country speed champion regained, Capt. Frank Hawks is pictured above in  
the cockpit of his monoplane as he landed at Curtiss airport, Long Island,  
after a record-breaking flight from Los Angeles. Capt. Hawks has announc-  
ed he may attempt to better his own mark next fall.

## Personal Mention

James A. Elkins and family of Na-  
vosota, Tex., are visiting his sister and  
family, Mrs. Will Jones.

Family night is to be observed Mon-  
day night at the Hope Miniature Golf  
Course. Two members of a family  
may play for 25c, according to Mrs.  
S. H. Battle, owner of the course.  
Thursday night there is to be a Flag  
tournament with a prize of \$1.00 for  
the low score.

A. S. Sheffer, manager of Mont-  
gomery Ward & Co., left Monday  
morning for Little Rock, to attend a  
meeting of store managers of this  
district.

Elmer Murph and Will Palmer left  
for various points in Texas, Sunday  
morning, on their vacation. They  
drove to Dallas Sunday. They are to  
visit Jim Murph, at Harlingen, Tex.,  
on the trip.

Production of tobacco in Italy in-  
creased from 22,064,000 pounds before  
the world war to 97,032,000 pounds in  
1929.

# FURNITURE MADE IT A HOME

WHEN man first tired of eating on  
the floor and rough-hewed from  
the log his primitive stools and tables,  
the art of graceful living began. Man  
had discovered the utility of furniture.  
He was later to discover its beauty. He  
had made his habitation a home.

In all places, in all times since, furniture  
has played an important part in man's  
life. Even today, it is the chief means  
by which he captures charm, comfort  
and convenience for his place of living.

In your home, your equipment is of  
paramount importance. If it is properly  
chosen, well arranged, it becomes a part  
of your environment . . . it expresses  
your individuality . . . it reflects your  
taste . . . it enables you and your  
family to learn and enjoy the art of  
graceful living.

Now is the ideal time to add new furni-  
ture to your home. Prices are at their  
lowest level since 1914. They will not  
stay down—indications are that fac-  
tory costs will soon start upward. So  
make your refurnishing plans at once.  
Consult the advertisements of furni-  
ture dealers in our columns, let them  
help you gain new home charm.

Brighten  
up your  
home  
with  
new  
furniture

## HOOKS AND SLIDES

by William Braucher

**The Lassman Lie**  
He was a champion, fearless and honest. They knocked his wife down in a game of football. He fought back the best he knew. A year ago he swam out to save a girl's life at Miami Beach. He was drowned in Long Lake, Maine, last month, his strength spent after he had saved the lives of two youths. And they strewed his watery grave with a pack of lies. His name was Al Lassman.

When dispatches from Harrison, Me., last month told of Lassman's taking a canoe out alone at night, against the camp's rules, and of the canoe being found overturned, it was left to the imagination that Al had taken the easiest way out. In the last game of the football season in 1928, you remember, Lassman was kicked into a coma from which he emerged a mental and physical cripple. New York University, his alma mater, helped him in his fight for recovery, and, in justice to the officials of the university, it must be recorded that their investigation of the circumstances surrounding his death cleared his name of the vile hint of suicide which the Maine camp officials suffered to flourish.

**It Was Hard to Believe**  
The story sent out from Maine belied the character of the man it aimed to discredit. Lassman never was a quitter. After lying unconscious for days after the fatal accident at Forbes Field, Lassman's first words out of a distraught mind were: "They're on our five-yard line, now, Chick (Meehan, the Violet coach), but we'll stop 'em this time." He underwent several operations after that in the attempt to restore his mental and bodily powers. He showed clearly the quality of courage that heroes have. So it was hard to believe he had slipped away into the water at night, as the stories from Maine indicated.

The university, a short time after his death, received an anonymous letter, giving a different story of the circumstances of Al's death. Al Nixon, graduate manager of athletics, pursued it. He caused Jerry Nemecek, who like Lassman was a counselor at the camp of Izzy Zarakov, where Al met his death, to leave the camp and questioned Nemecek closely.

### DID YOU KNOW THAT—

BABE HERMAN scored the run the other day that beat the Giants and then hurried away to see Babe Herman III, who had just come into the world. He is Babe's second son. . . . Strange to say, there were no rumors of the Kid Chocolate - Kid Berg fight being "in the bag." . . . In a quaint little cemetery at Hamburg place, near the track at Saratoga Springs, New York, lie the bones of famous thoroughbreds, such as Nancy Hanks, Ogden and Hamburg. . . . Lately Sir Martin, sire of Spinach and other good horses was buried there. . . . The French say that Rene Lacoste will be back on the courts next year. . . . which won't do America a bit of good. . . . Rube Marquard, 41, manager of the Jacksonville team of the Southern League, occasionally pitches a pretty good ball game for himself. . . . Del Pratt is playing manager for Waco, in the Texas League.

### Damaging Silence

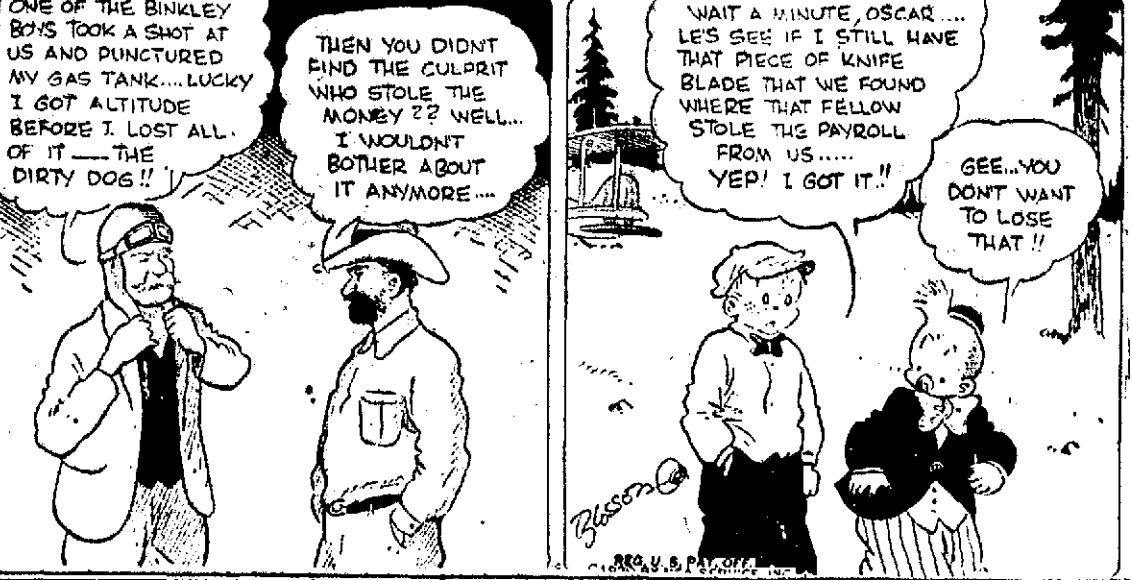

NEMECEK finally admitted that it had been decided at a meeting to maintain silence regarding the facts of Lassman's death—in order that the business of the camp might not be hurt by the near-drownings in which Al played the heroic role. One of the counselors at the Zarakov camp was Al Masters, the Dartmouth star of 1929. Nemecek is captain of the "New York U. eleven" this season. Zarakov, who operates the camp at Long Lake, is a former Harvard football player.

Had it not been for the anonymous letter writer—a man who later let his name become known—Lassman's last beautiful sacrifice might have been handed out to the world as an ugly surrender to the tempting darkness.

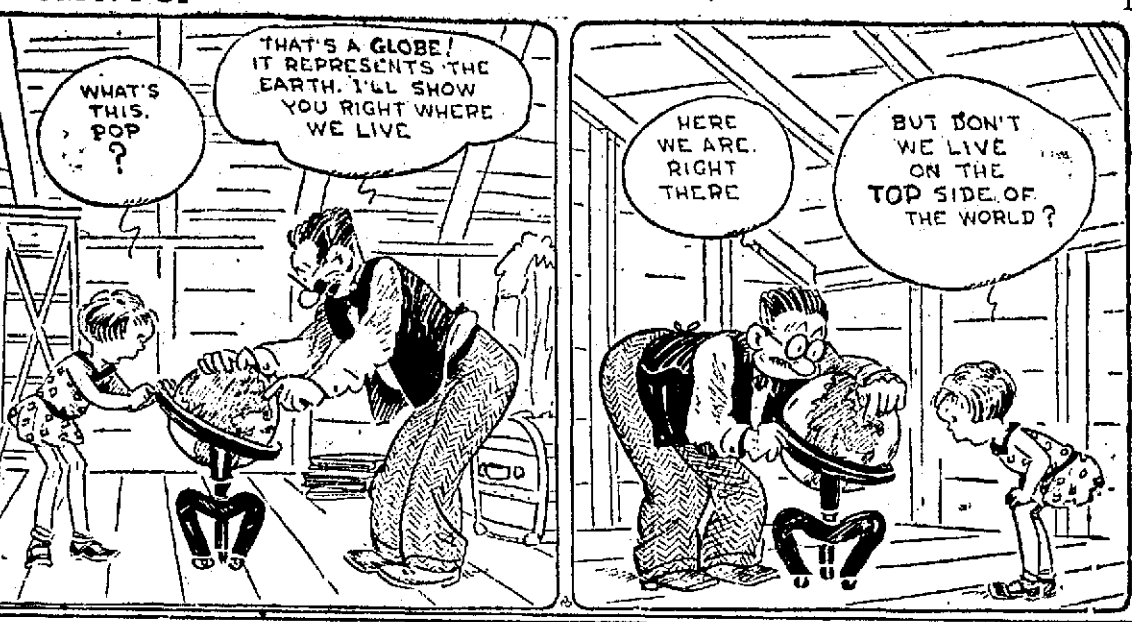

Gangland and the underworld and the modern larceny of the prize ring offer no parallel example of man's inhumanity to man.

This little story almost makes you want to turn and look over your shoulder in apprehension of seeing there some wretch about to slit your back. It is shuddering.

## Sir Thomas Lipon's Shamrock Arrives in U. S.

A trim invader from overseas, Sir Thomas Lipon's slim racing yacht, the Shamrock V—newest challenger for the America's Cup—is shown here as it dropped anchor at the mouth of the Thames river, at New London, Conn. At the left is the three-masted steam yacht Erin, which conveyed the racer across the Atlantic. The Shamrock, 81 feet long on the water line and 135 tons, made the ocean passage of about 4000 miles in 23 days, without injury or mishap despite headwinds and two fierce gales, encountered in the crossing.

### Thank You

I wish to thank the good people of this town and township for the splendid vote given me in the August primary.

E. M. ROOKER

### To the Democratic Voters of Hempstead County

To my friends and supporters of Hempstead county, I wish to express my appreciation for the excellent vote given me in my race for representative.

This being my first race for public office, I feel very proud of this vote, under the circumstances. I feel duly repaid for the time and expense I was out, by the great number of new friends made in this campaign.

If nothing unforeseen happens, I will see you again two years from now.

Yours sincerely,  
EMORY A. THOMPSON

### Aboard the Navy's Giant Dirigible

It's seldom you see a picture taken aboard the U. S. navy's giant dirigible, Los Angeles, during a flight, but here is one. This scene shows the interior of the control car on a recent short flight from the hangar at Lakehurst, N. J. Observe the numerous dials, charts and instruments that the man at the wheel has to watch.

### Largest Omelette

FORT MORGAN, Colo., Aug. 18.—(UP)—A truck carrying many cases of eggs and cans of cream collided with an automobile near here. The result was the biggest omelet ever seen by Fort Morgan residents.

### Contempt of Court

GREELEY, Colo., Aug. 18.—(UP)—Roy Prout of Plattville was fined \$5 and costs for contempt of court by Justice E. C. English. Prout swore out a warrant against Earl Dolton, charging Dolton with operating a confidence game, and then refused to prosecute, saying he "had more important business to tend to."

### Plenty of Sunshine

GUNNISON, Colo., Aug. 18.—(UP)—There have been only nine days in the past eighteen months in which the sun failed to shine for at least a few minutes here, according to Harry Dye, manager of a local hotel.

### Rails to Chili

PUEBLO, Colo., Aug. 18.—(UP)—A solid train load of steel rails was shipped from the local plant of the Colorado Fuel and Iron company. The shipment was consigned to the state railways of Chile. From San Francisco the rails will be shipped to South America by water.

# The Hollywood Story

COPYRIGHT 1930 by NEA SERVICE, Inc. by ERNEST LYNN

**BEGIN HERE TODAY**

DAN RORIMER, temperamental young man of Hollywood, can't get along with the studio manager at Continental Pictures and tears up his contract in scornful anger and asks to be freed. But he isn't. Dan has become keenly interested in ANNE WINTER, a young girl from Tulsa, Okla., who is working as an extra. She has had some experience, and she knows enough to warrant a screen test at Grand Central studios.

Dan lives with PAUL COLLIER, who writes a daily movie column for a string of newspapers. Anne lives with MONA MORRISON and LILA HARTLEY, two extra girls.

GARY SLON, famous Hollywood director, has shown some interest in Anne Winter. Dan does not care much for Slon, but is an admirer, however, of MARTIN COLLINS, formerly of Continental, now with Amalgamated. Collins invites him to a house-warming at his home, and he brings Anne along.

There Dan meets a charming young actress named MARIS FARRELL, who takes a liking to him, and who is being introduced by FRANK MAURY, a connected chairman of the screen.

**NOW GO ON WITH THE STORY CHAPTER XVIII**

She was small and lovely, and he thought her eyes surprisingly dark for such light hair.

THE pool lay in the middle of the lawn in the rear, fringed by tall palms. And it was here that Anne and Collins found Dan Rorimer. He had drawn off to himself from the noisy group that was ranging the grounds, and he was standing with one hand thrust deep into a trousers pocket, while he smoked a cigaret and gazed at the sky.

Collins approached noiselessly, said, "What do the stars foretell?" in a deep bass, and Rorimer swung around half guiltily.

"This young lady," Collins said, taking Dan's arm, "has been looking all over for you. She asked me," he added, unbecomingly of Anne's laughing protest, "if I wouldn't take her by the hand and find you. . . . Where's Maris?"

"Over there," Dan nodded his head toward the little stucco building that housed the dressing rooms. "She's picking out a bathing suit; she wanted to get a green one."

Collins granted, "Maris," he said, "would be particular about the color. Think I'll go over and speak to her."

He wandered off, singing, leaving Anne and Rorimer alone.

Dan said, "Well, how do you like the party? Having a good time?" And Anne nodded. "Just perfect. I adore Mr. and Mrs. Collins, don't you?"

He grinned and shook his head, and told her that he was saving his admiration for somebody else. "But I like them fine. They're great guys—both of them. . . . What do you feel like doing, Anne? Want to walk around the pool, or sit down and wish at the moon, or shall we dance? Gee, I haven't had a dance with you yet," he reminded her.

"Whose fault is that?" Anne asked, moving toward the brink of the pool.

"Not mine," Dan said, ranging beside her again and holding her arm. "Don't fall in, now; you'll spoil your dress." And he wanted to know how she could expect him to get a word in, with Maury forever at her heels. "I thought that guy never would let you go."

Anne sighed. "I thought so myself," she said. "Martin Collins saved me; I think he read the distress signals in my eyes. . . . But you," she added, "didn't seem to be perishing on the vine exactly."

"Oh, you mean Maris Farrell?"

ANNE WINTER nodded, and Dan laughed and started to say something about Maris Farrell, but Anne interrupted him. "She had glanced toward the house and bo-

own and shook it as if he were saying goodbye; and as Maury began to fume and struggle he tightened the pressure of his grip, so that Maury winced.

Maris said, "You'll excuse me for a few minutes, I know, Frank." And Dan said, "Be big-hearted, Mr. Maury."

The girl moved off toward the dressing room, and as Dan started to follow, Maury gave him a violent tug that swung him around and brought a sudden blaze into Rorimer's eyes.

"You're pretty fresh, aren't you?" the actor said, his face twisting in fury.

Dan jerked his hand from the other's grip, and for a moment he stood there and waited to see what Maury might do. But his anger quickly passed; the man was drunk and he felt it would be childish to quarrel with him.

So he said, "I'm sorry," and he turned away abruptly and left him.

When he caught up with Maris Farrell the girl gave him a grateful smile and took his arm and they continued toward the dressing room.

"Did he get hasty?" she wanted to know, and Dan shook his head. "I don't think he's very crazy about me, though," he laughed, and he told her of his earlier run-in with the actor.

Maris said, "Poor Frank!" They came to the edge of the pool, and she stopped and looked at the water, and then at the moon it reflected, and observed that it was no night to be indoors.

SHE continued to chat pleasantly and Dan found occasion to study her. She was small and lovely, and he thought her eyes surprisingly dark for such light hair. And her eyebrows were black, or nearly so.

She inquired after Paul Collier, told him that Paul had written one or two things about her that she appreciated greatly. "Everything helps, you know," she said with a frank smile. And presently she asked him a question about Anne Winter.

Rorimer suspected that she had been leading up to this. Maris, he felt, was a little curious about Anne, and he was somehow glad that this was so.

So he informed her about the forthcoming picture at Grand United and the screen test that Anne had had; and Maris showed real interest and questioned him further.

"Was she a dancer on the stage?" she wanted to know, and when Dan enlightened her she said:

"That's very interesting. They must be more than ordinarily interested in Miss Winter to do all that." And she explained that the selection of a dancing chorus for a revue usually was a routine that was left to the dance director.

"There are hundreds of applicants for each picture—chorus girls from the stage, and extras that have picked up dancing at schools—and they're generally just sixty-dollar-a-week jobs at best. So they must have something unusual in mind for Miss Winter, to go to all that trouble, and especially to give her a screen test."

Dan said he hadn't given that angle much thought. "You're very encouraging," he told her. "I'll be sure to tell her what you said." And Maris, smiling at him, asked if Anne Winter was an especial friend of his.

## Lincoln's Minstrel to Appear in Hope Friday

Jolly E. Davis himself, the greatest gloom chaser in the world, known as "Sweet Papa Snowball" to thousands of minstrel fans will be here with the Lincoln show next Friday night, with a show as big as a circus and offering many new and novel acts as well as the big minstrel itself. The management claims to have surpassed any of its previous efforts.

The big chorus headed by Goldberta Hudson, record blues singer and the gang of funny men, will give you an evening's entertainment that will never be forgotten.

Big parade each day with many novel acts on the street and a big free act at night on the show grounds.

### ROBINS

TAKE ABOUT EIGHTY DAYS FOR THEIR TRIP SOUTH IN FALL AND ABOUT SEVENTY DAYS FOR THE RETURN TRIP IN THE SPRING.

### EEL GRASS

A WATER PLANT WHOSE PISTILLATE FLOWERS GROW ON LONG STEMS AT THE SURFACE, DEVELOPS ITS STAMINATE FLOWERS FAR BELOW, WHERE, AT THE PROPER TIME, THEY BREAK LOOSE AND FLOAT TO THE TOP, TO DISCHARGE THEIR POLLEN. AS SOON AS EACH PISTILLATE FLOWER IS VISITED BY THE DRIFTING POLLEN GRAINS, IT SPIRALS DOWN INTO THE DEPTHS TO SHED ITS SEED.

## Big Cherry Yield

LOVELAND, Colo., Aug. 18.—(UP)—Lewis King claims one of the best yielding cherry trees in this district. He obtained 250 pounds of fruit from the tree this year.

## Boy Bites Snake

WOOSTER, O., Aug. 18.—(UP)—There was a snake about these parts that tried to bite and got bitten. Allen Manson, 17, bit the reptile, a blue racer, when it coiled around Manson's neck. Manson bit and kept on biting till the snake relaxed. Then the youth killed it with a stick.

## Botanic Gift

CLEVELAND, O., Aug.—(UP)—Edo Nicholas Claassen, 37, has donated 10,000 botanical specimens, representing a collection which took more than a half century to make to Western Reserve university here. Claassen trumped over Italy, Germany and parts of the United States in gathering the specimens.

## Aid Quake Victims

YOUNGSTOWN, O., Aug. 18.—(UP)—Members of the Sons of Italy organization postponed a holiday excursion trip to Cedar Point, Lake Erie resort, and decided to send the money they had planned to use for their own pleasure to sufferers in the Italian earthquake district.

## Old Stone Jar

MARYSVILLE, O., Aug. 18.—(UP)—Harry E. Taylor, school principal here, has a stone apple butter jar that has been in his family for 100 years.

## IT'S WISE TO CHOOSE A SIX

# Announcing a new production record

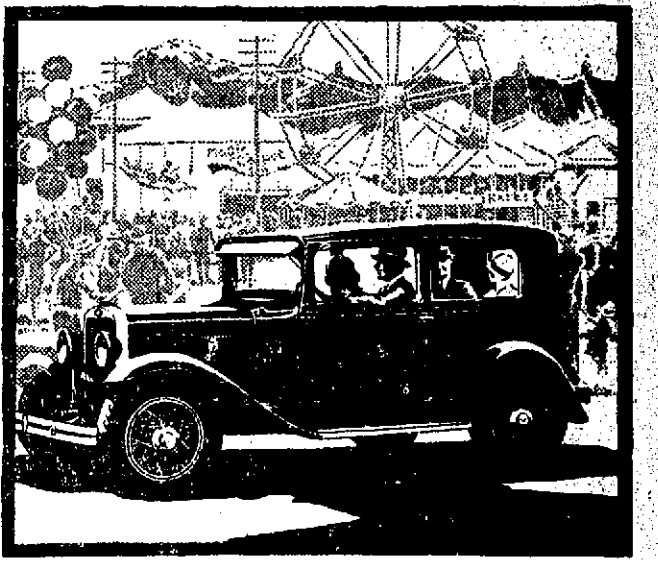

## 2,000,000 Chevrolet Sixes now on the road

Since January, 1929, Chevrolet has produced and sold over 2,000,000 six-cylinder automobiles—nearly five times as many as any other manufacturer has ever built in an equal length of time.

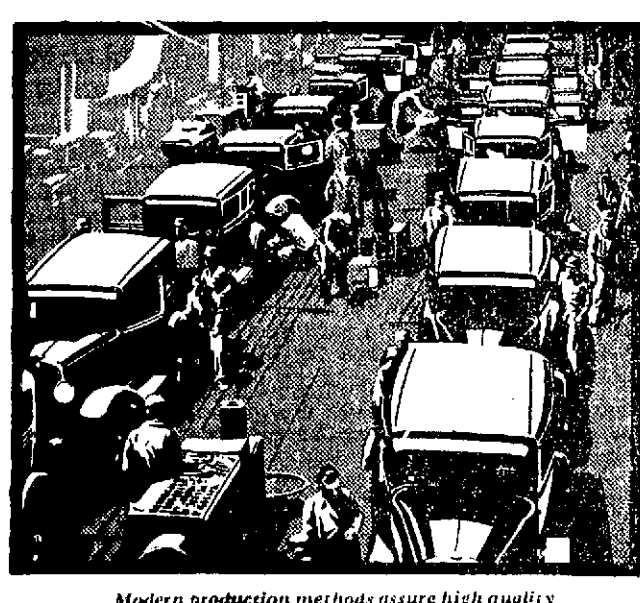

These 2,000,000 buyers have chosen Chevrolet because it offers many desirable qualities not obtainable in any other car so low in price—

- the smoothness, silence and flexibility of a modern six-cylinder valve-in-head engine—the greater comfort and roadability of a modern, full-length chassis—and the style, safety and distinction of bodies by Fisher.

Yet, despite these fine car advantages, the Chevrolet Six is unusually economical. Its gas, oil,

The Couch, 1936, J. A. B. Flint factory

Modern production methods assure high quality

tire and upkeep economy is unsurpassed. And any model can be bought for a small down payment and easy monthly terms! Come in today. Learn for yourself why two million buyers have agreed—"It's wise to choose a Six."

### Some distinguishing features

50-horsepower six-cylinder motor . . . 48-pound crankshaft . . . full-length frame . . . four semi-elliptic springs . . . fully-enclosed four-wheel brakes . . . four Lovejoy hydraulic shock absorbers . . . dash gasoline gauge . . . Fisher hardwood-and-steel body . . . adjustable driver's seat . . . safety gasoline tank in the rear . . . non-glare VV windshield . . . and, for your protection, a new and liberal service policy.

## Rye For the Winter and Spring Grazing

### Rye Stands More Cold Weather Than Either Oats or Barley

Grazing Crops may be relied on to help meet the feed shortage during the late fall, winter, and early spring. Any of the small grains may serve this purpose, but rye is the safest and should receive first consideration.

Rye stands cold weather better than oats or barley, and it is fully as hardy as wheat. It will thrive on poorer soil than any other small grain crop, and it is just as good for a winter cover crop. Rye is not quite as nutritious as other small grains, but it will produce more grazing in cool weather.

Altuzzi rye is the best variety for Arkansas because it is earlier and makes a more rapid growth. If Altuzzi is not available, Tennessee or Southern rye may be used. Rosen rye is very late and is not adapted to southern conditions.

To get the maximum amount of grazing rye should be planted early, the later part of August if the weather permits. In case there is not enough moisture for early planting, rye may be planted as late as any small grain, but the amount of grazing will be less. If early planted rye makes too much growth and threatens to start rotting before winter, grazing will hold it back.

Rye should not be grazed severely before it gets a good start. It is best to have two fields of rye, or a field of rye and one of oats, so that grazing may be alternated. When the crop is grazed close to the ground, stock should be removed long enough for the plants to recover.

Mrs. S. H. Battle and Miss Dove, of Hope, were visitors in Blevins Saturday afternoon.

## Poultry House of Cloth Raises Farmer's Profit

CHARLOTTE, N. C. (AP)—By using materials that most farmers and poultrymen would throw away, W. F. Spangler, of Charlotte, has built a house for 1,000 laying hens at a cost of less than \$30.

The plan is simple. Spangler saves the cotton bales in which he receives chicken feed, cuts pine poles from his own woodlot for the frame work, and stretches the bales over the poles. Three coats of tar and lime are applied to the cloth and the house is water and weather proof.

This method has enabled Spangler to build up his profits on each hen an average of \$2 annually per bird. He says the cloth house is practical for use in any part of the United States.

## Deep Water Well Is Being Repaired

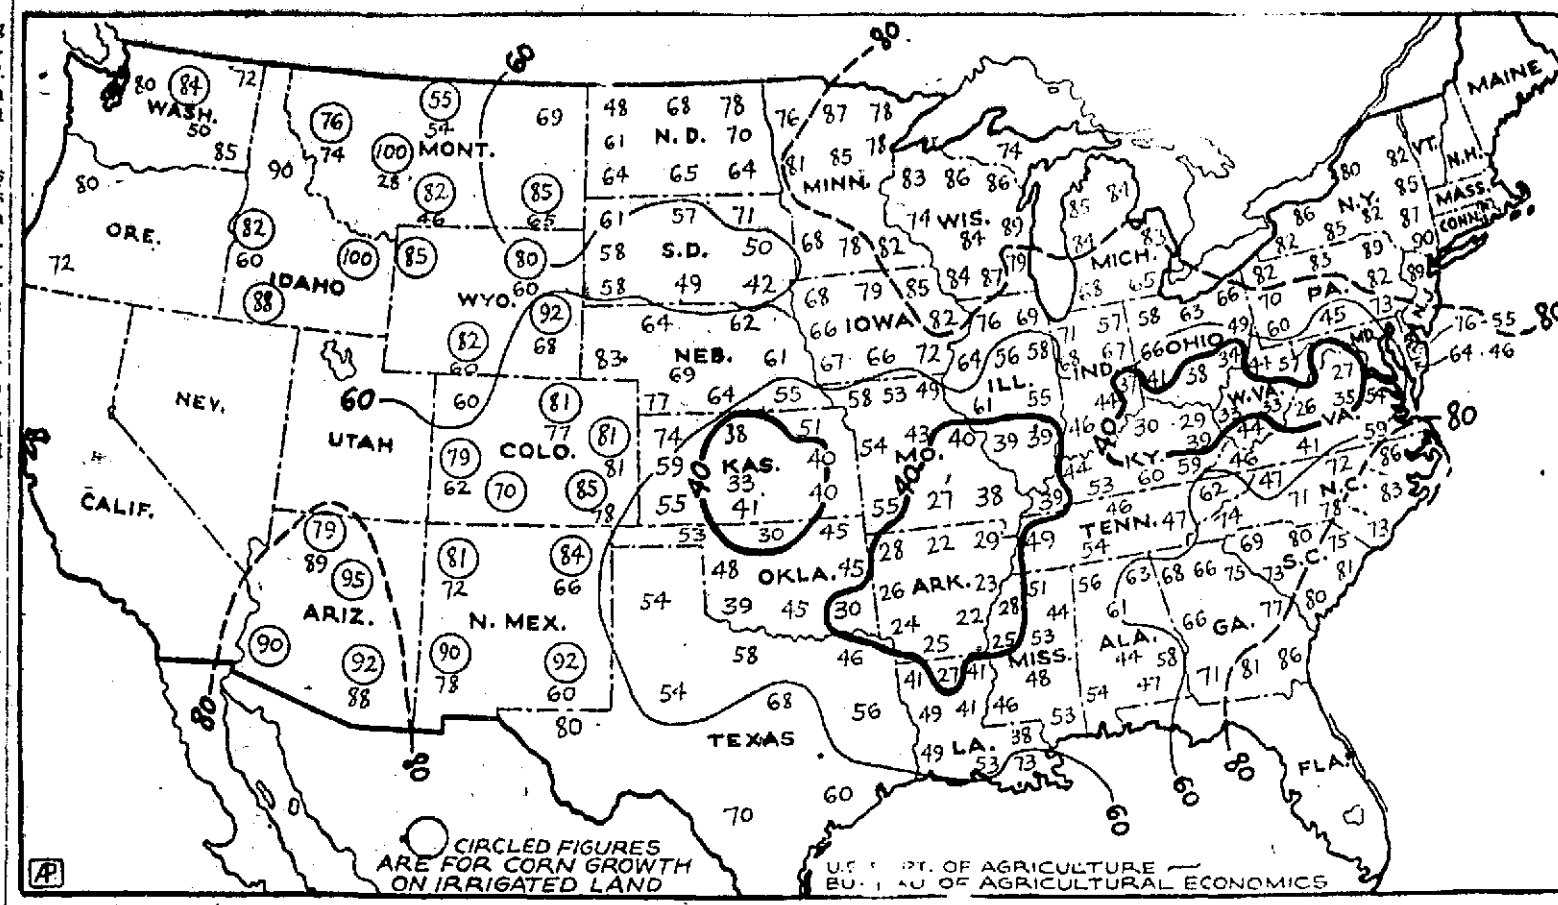

### Continued Dry Weather Necessitates Work to Be Rushed

Several years ago a deep well was drilled in McCaskill for the towns water supply. Later from some cause this well was abandoned. It was never badly needed until this season when many of the shallow wells and all of the stock ponds have gone completely dry.

As the seriousness of the growth became more apparent business men of McCaskill turned their thoughts to this deep well and means of getting it cleaned out and getting the water to the surface.

It is thought that this work will be completed within a short time now. Many people both in the town of McCaskill and farmers living nearby have been forced to haul water, both for themselves and their live stock for several weeks.

## Beat Drought After It's Over--Uncle Sam

Figures on the map represent the condition of corn as of August 1, this year, on the basis of 100 as a full, or normal crop.

By FRANK L. WELLER (Associated Press Farm Editor) WASHINGTON—Emergency food and feed crops—the best known to the accumulated experience of three of the oldest bureaus in the department of agriculture—have been brought into the immediate foreground of the national drought-relief program.

Recommendations to be followed as soon as rain softens the heat-hardened fields and gardens just have been formulated. They resulted from studies originally instituted for the development of means to forestall unnecessary depletion of breeding stock where months of relentless sunshine had cut the prospective corn yield to 40 per cent of normal and burned up 70 per cent of the pasture.

**Fifty Years' Experience**  
Dean of the collaborators, the bureau of animal industry, had 50 years of history to turn to for suggestions. The bureau of dairy industry, once a part of the animal industry division, had almost the same.

The bureau of plant industry, organized in 1902, had rich experiences with effects of the 1901 drought from which to draw recommendations for food crops when the drought's persistence endangered more than feed grains.

Concerned first with the more serious shortage of livestock feed, the bureau recommended fall-sown pastures, emergency hay crops and maximum use of roughages to get stock through the winter and early spring. Winter wheat, rye and barley, they said, make excellent late fall and early spring pastures.

**Pasture For Spring**  
A 10-year experiment on the government farm at Beltsville, Md., shows that an acre of fall-sown wheat or barley will supply good grazing for 10 mature sheep for 21 days.

Rye provides pasture for 18 days. An advantage of rye is that it is less likely to winter-kill than wheat. In many localities these crops can be grazed carefully in winter and early spring, then allowed to mature a grain crop. If properly managed, grazing aids rather than injures the crop for use as a harvested cereal.

In the southern part of the corn belt, and in the cotton belt, locally adapted varieties of rye make much more pasture than northern-grown rye.

Corn stubble ground may be prepared quickly and satisfactorily with a disk harrow. A little more seed may be planted than usual, and a fertilizer applied, preferably one rich in nitrogen, to induce quick and luxuriant growth.

**Oats Good in South**  
Winter oats may be preferable to rye as a pasture crop in the southern part of the drought-stricken area. Advice on this matter, the bureau suggests, should be obtained from county agricultural extension agents or state experiment stations.

In the lower half of the corn belt and the south—rain comes so that seedling can be made on or before August 20—such crops as millet, sudan grass and cowpeas are a reasonably safe risk for making hay before frost. These crops may be pastured or may be cut and fed fresh from the field to animals in lots or barns, a practice known as "soling."

Rye and vetch in the northern part of the drought area, and rye, winter oats and vetch in southern sections, may be seeded in the fall and cut in the late spring for hay-making; or pasture if it is not. The use of vetch should not be attempted, the bureau said, unless local experience indicates that it can be grown successfully.

**Don't Forget Silo**  
All the corn crop that will not mature and that has not become too dry should be turned into silage. Good silage should contain not less than 60 per cent moisture. Only an expert can tell from a superficial examination what the moisture content is, particularly on immature, drought-

withered corn. A simple moisture test recommended by the bureau can be made with a stalk of corn taken from a representative field. Cut it in half-inch lengths, they said, and weigh out exactly 25 pounds. Dry thoroughly by spreading a thin layer in the sun, or place in a moderately heated oven, being careful not to char it.

If the dried material weighs more than 16 pounds, the corn in the field from which it was taken is too dry to put in the silo without the addition of water.

What has been said of corn applies also to the sorghums. Both the sweet sorghums and the grain sorghums are excellent silage feeds, and many cattlemen in the Great Plains area store them at small expense in pit or trench silos.

**Stack Under Cover**  
Such roughages as corn fodder and straw should be well stacked or stored under cover to prevent the serious loss of palatability and food nutrients through exposure to sun and rain.

The edible portion of nicely cured fodder compares well with timothy hay as a feed for dairy cows. God oat straw, fed with some succulent feed such as silage, root crops, soiling crops or pasture, is equal to corn stover and compares well with the poorer grades of clover hay for sheep and beef cattle.

A succulent, laxative feed should be fed with such roughages as straw and corn fodder. Turnips can, safely be sown in most sections of the country as late as the middle of August. They mature quickly and are relished by sheep and dairy cattle. With dairy cattle they should be fed immediately after milking to minimize objectionable tainting of the milk.

**Clover Chaff For Feed**  
Soybean straw and sweet clover chaff have been used to advantage as emergency feeds. The former, fed with shelled corn and linseed meal to sheep at the Ohio experiment station, was found to be worth one-third as

much as clover or alfalfa hay. Sweet clover chaff, a by-product of the sweet clover seed industry, reduced by 20 per cent the cost of wintering a flock of ewe lambs at a government station last year when fed at the rate of two pounds of chaff and 2 1/2 pounds of alfalfa hay per head daily.

With good rains before September, sudan grass, millet and cowpeas may be planted as emergency "catch-crops" for hay; in the south, sorghums and cowpeas and, particularly in the Gulf states, soybeans. Otherwise they should provide pasture during fall and winter.

Whether it rains or not, these pasture crops should be valuable in conserving hay which, at best, the bureau said, will be scarce in the drought regions.

**Late Planting Tricks**  
The first good showers will open the fall gardening season in areas of late frosts. In many places bush beans, beets, early maturing radishes, cucumbers, lettuce, mustard, radishes, spinach and turnips are suitable crops.

It often is a good practice when planting late, to soak the seed in warm water over night and the following day drain off the water and roll the seed in dry sand or soil to absorb excessive moisture and make them easy to separate in planting. Soaked seed should not be planted in dry soil and seed should be placed deeper and thicker than in spring planting.

**Lovely Turnip A Favorite**  
Probably no emergency crop will be a greater favorite than the turnip—necessity a staple food for man and beast. The drought is expected to give it a picturesque return to prominence. In many sections it may be seen for the first time since the early steeler, arriving too late for other crops or his substance destroyed by inclement weather, wild animals or Indians, planted turnips as the sole winter sustenance of his family and his stock.

**DeAnn Farmers to Meet With 4-H Clubs Tuesday**  
Farmers of the DeAnn community will meet in joint session with the DeAnn 4-H club at the school house Tuesday, August 19, at 8 p. m.

The drought situation and all possible immediate and future relief will be the main topic of discussion in connection with other farm problems, according to Grover C. Kincaid, assistant county agent.

**Try Rye As Chicken Feed**  
DUSSELDORF, Germany (AP)—Manufacturers of concentrated feed are experimenting with a process which they expect to enable the use of rye as a chicken feed.

## Many Farmers Hauling Water Near Washington

Many farmers between Blevins and Washington are forced to haul water from deep wells, due to the dry weather of the past two and one half months. The water situation is one among the most serious things the farmers of that section have to contend with it is said.

## Dairymen Plan to Attend Exposition

### Herds From the Leading Dairies in the U. S. to Be On Display

Dairymen and farmers of Hempstead county are planning to attend the 24th annual National Dairy Exposition at St. Louis, October 11 to 19 according to County Agent Lynn Smith, who is organizing a delegation.

More people are thinking of dairying in terms of scientific agriculture than ever before. The progress of the dairy industry will be seen at this Exposition, when it opens for the second time in its new \$1,500,000 home. The best animals of the five dairy breeds, from the leading herds of the United States and Canada will be in competition. There will be large exhibits of dairy products, machinery and supplies.

The United States Department of Agriculture and various State Colleges will have educational exhibits. The St. Louis Poultry Show, the Woman's Home Exposition and the St. Louis Horse Show are combined with the Exposition and will be held at the same time. College students, 4-H club members and Vocational Agricultural students from all parts of the country will have an active part in the big show.

All railroads have offered special low round trip rates for the Exposition. Many visitors will go by auto as St. Louis is on a number of national highways.

## SWEET HOME NEWS

The Baptist meeting closed with one addition. Mrs. W. T. Yarbber and little son, James Sewell, also their parents, Mr. and Mrs. Sam Sewell, visited in Prescott Friday afternoon.

Willie Huskey and family spent Wednesday night with J. M. Huskey and family.

Mrs. Ben Woodson and infant son visited home folks Friday night.

Mrs. Will Spens and family spent Friday afternoon in Prescott.

Joe Britt has gone to Delight to appear as a witness in court.

## BELTON NEWS

Sunday school and B. Y. P. U. was well attended here Sunday.

A good rain relieved this heat stricken community Monday evening. Everybody is busy now planting their fall crops.

Little Coy Tinsley of McCaskill was laid to rest in the Merrell cemetery near here last Wednesday.

Mr. and Mrs. Vomer Daniel of Smekover are visiting relatives at this place.

J. L. Eley and Pierce Hutson were in Hope Monday.

Douglas Chism is working at Columbus this week.

## McCaskill Gins First 1930 Cotton

### First Bale of Season and First Bale on New Gin Friday

A Mr. Poplin, living on the Brown farm, near McCaskill, brought the first 1930 bale of cotton to the S. C. Stone gin last Friday.

Not only was this the first bale of the season but it was the first bale to be ginned on the gin, which has recently been purchased and erected. It is of modern type and said by expert ginner to be one of the best gins in Hempstead county.

The bale was not sold but a premium for the honor in bringing in the first bale, was made up by the merchants and business men of McCaskill and given to Mr. Poplin.

## Corn Brings More as Pork Fish Meal For Livestock

NOYOCK, N. C. (AP)—By feeding his corn to hogs, W. F. Seaff, Currituck county farmer, realized from \$1.25 to \$1.50 for his last year's crop. This averaged approximately 50 cents above the market value.

## Cantaloupe Fields Plowed Under

### By Using Disc on Fields Vines Will Soon Rot For Fertilizer

Cantaloupe growers in the vicinity of Blevins, now that the shipping season is over are turning their thoughts to the preservation of their land and to raising another crop on the cantaloupe ground this season.

Already several of the growers have been working on their fields with breaking plows and discs. They claim that even if they do not plant another crop on the land it is much better to have the vines turned under in order to enrich the land. A green crop of even weeds, turned under makes the ground more mellow and also cuts down on the fertilizer bills in making another crop.

This season has been most unusual. Fields that ordinarily produce well have yielded poorly due, of course, to the drought. Cantaloupe patches are as a rule richer than the main crop fields and consequently the largest percentage of them will be planted to some fall and winter crop.

## Repairs Made on McCaskill Gin

### H. M. Stephens' Gin At McCaskill Repaired For Season

Repairs are being made on the cotton gin owned by H. M. Stephens at McCaskill, preparatory to the opening of the ginning season, which is expected within a short time.

McCaskill will have two gins in operation this season, a new gin having been purchased and erected by S. G. Stone this summer. The new gin has already ginned one bale this season.

## Our Poultry Column

Edited by Prof. Frederic H. Stoneburn

Without charge, our readers may secure expert personal advice on poultry topics. Address inquiries to Southern Poultry Review, Inc., 1000 Broadway, New York, N. Y. Send your problems fully; enclose stamped self-addressed envelope.

WHAT about the future of the commercial poultry industry? What may we expect in the way of prices and possible profits during the balance of the present season? What may we hope for next year?

Such questions have been fired at me from all over the South during recent months. Poultrymen everywhere are deeply concerned and are groping for light on matters like this which so seriously affect them. I wish, devoutly, that I might give correct, specific, detailed replies. This I cannot do. But I do hold a deep-seated faith in the poultry industry as a profit-producing agricultural specialty, a firm belief that already there is a marked change for the better and that conditions will improve progressively until by next season we will again be back on a basis which will be entirely satisfactory to every efficient poultryman.

It must be admitted that during recent months poultrymen have found themselves in a trying position. But who hasn't? Production of all other kinds of agricultural products have been in the same, or worse condition. Unemployment has hurt our working population. In the last analysis the efficient poultryman has been far better off than those engaged in industry or other lines of agriculture.

LET us consider the actual facts as they now exist and draw our conclusions therefrom.

At intervals we experience periods of stress in the poultry industry. Without exception, such bad seasons have been followed by one, two or even three years of unusual prosperity for poultry producers. Those poultrymen who have had the vision and courage and carried on were richly rewarded. It is fair to assume that this will happen again. Just on the basis of past experience I look for 1931 to be a very satisfactory year in the poultry field.

But equally important is the fact that conditions today seem to be so shaping themselves as to force a decided improvement in the national poultry field.

THE most unfavorable factor in the whole picture is the cold storage situation. As of July 1 the storage warehouses contained 9,000,000 pounds of frozen poultry in excess of the five-year average and 1,200,000 cases of eggs in excess of that average. The presence of this surplus is bound to have its effect upon quotations on fresh stock until the storage holdings are reduced to normal.

The second unfavorable factor is the possible sharp increase in the cost of poultry feeds. At this writing, early August, the level of grain prices is moving upward due to the probable great decrease in crops resulting from the unprecedented drought. Prices of all feed grains are affected.

RELIEF to the producer will come through increased consumption of poultry products to quickly absorb the storage surplus and/or from reduced national pro-

duction. Both are probable. Business and financial interests are generally in accord in the belief that industrially and commercially America is on the upgrade again and that basic conditions will improve rapidly and continuously. That simply means that purchasing power will be increased, people who have been doleful without poultry products will again consume these in great quantities and the surplus in storage will be wiped out. Again, consider what happened in former years when this condition maintained.

A sharp reduction in the production of market eggs seems inevitable and probably in the supply of table poultry also. This will follow the drastic cut in farm poultry flocks (from which the major part of our national poultry products come), poorer quality of layers due to scanty feeding of pullets during their growing period and reduced rations given the present laying flocks. This tendency to "save feed" has been intensified by the effects of the nationwide drought and is general. The results are bound to be noted in the form of greatly reduced output of eggs which can not fall to have a favorable effect upon egg quotations.

FROM the national survey made by the Bureau of Agricultural Economics, U. S. Department of Agriculture, we learn that on July 1 the number of layers in farm flocks was below the five-year average. Since that date there has unquestionably been a further big decrease as farmers, birds by the drought, have sold their birds to secure ready money, and have used them freely on their own tables. The official report quoted predicts a lower output of eggs this fall and winter due to the decrease in number of laying hens, the probability that fewer pullets will be carried over and the effects of reduced rations due to the shortage of feedstuffs. The new tariff operates here also as, because of the higher rates on shell eggs, frozen eggs and table poultry, the importation of these commodities will be discouraged and the market left to the American producers.

Finally, the report says: "The probable decrease in the production of eggs during the winter and next spring should improve the relative price situation for eggs next spring."

UNDERFEEDING and hot weather have lessened normal production during recent weeks. In most sections egg prices have already moved upward in a satisfactory way. The poultryman who follows modern methods is making money now and is in better position than other agricultural producers. The outlook for the future seems bright. In my opinion this is a good time to remain in or to get into poultry husbandry, provided one is willing to adopt improved methods of management and feeding and use stock of proper breeding, thus cutting production costs.

## Blevins Ships 54 Cars Cantaloupes

### Six Weeks Shipping Season Closed Last Week

An unusually long cantaloupe shipping season has ended at Blevins and the surrounding territory for another year.

The drought cut the quantity of the crop down to about a third of what is usually shipped from the territory but the quality is said to have been better than was thought at the beginning of the season.

Such a long shipping season is also accounted for by the extreme dry conditions of the summer.

The Blevins shed ordinarily ships about 85 car loads each season and their shipment this year was 54 cars. This amount, while only slightly more than a third of the average is considered good, due to the hot sun and hot wind with no rainfall on the crop for over sixty days.

## Bridge Workers Near McCaskill

### Work on Bridges For Highway Number 24 Progressing

A force of bridge workmen arrived in McCaskill last week and began work on the new highway bridges between McCaskill and Nashville on highway 24.

Grading on this road is rapidly nearing completion, only a few more miles remaining to be graded.

The grading across the Ozan bottom, between McCaskill and Blevins is expected to begin as soon as the work between McCaskill and Nashville is completed.

## New Use Found For Green Tomatoes

### A Discovery That the Tomato Makes An Excellent Green Feed Has Been Made By A County Turkey Raiser, Near Blevins

BY ERLE C. TURNER

Green feed has always played an important part in the diet of young and growing turkeys.

A section of Hempstead county that is rapidly becoming recognized as a turkey raising section is that near Blevins.

With the unusual drought and scarcity of green material owners of the turkey flocks have had a problem on their hands to supply the necessary green food for their birds.

This season a large acreage of tomatoes was planted throughout this section and after the shipping season had closed, one of the turkey raisers, who had a large tomato patch, conceived the idea of utilizing the tomatoes as green feed for her flock of 100 young turkeys that were not growing as rapidly as they should on account of not having a sufficient amount of green feed, and with none available on account of the dry hot weather.

At first the young poult were

walk up to the tomatoes that were put in their pen, turn away in disgust and return to the shade. Within a few days however, they began to pick out the seed of the tomatoes and from that a taste for the entire fruit was created. At the present it is a real job to gather enough tomatoes to fill them up.

Since beginning to feed tomatoes a remarkable growth has been seen in this flock of turkeys and the green feed problem has been solved.

Of course the food value content of this crop is not known, but with the continued dry weather and all other available green feed dried up the tomato has proved to be of great value. As there is no market for that particular crop at this time, since the shipping season is over the crop is by no means lost and profit from the tomato patch is hoped to be included in the profit from the turkeys this fall when they are marketed.

## Farmall Prices Reduced!

"We are glad to be able to make a reduction in the FARMALL tractor price at this time because right now the farmer is seriously in need of anything that will help him to cut down his costs of crop production.

"As the original all-purpose tractor the McCormick-Deering FARMALL has won tremendous popularity. More than 100,000 FARMALLS have been built. Already this tractor has created a real revolution in farming. It is the best investment a farmer can make.

"The new price, \$930.00 delivered to your farm, is the lowest ever placed on the FARMALL."

You have probably seen the FARMALL Tractor at work. If not, we will demonstrate it at any time, on any job. The FARMALL replaces 6 to 10 horses and 2 to 3 men. It plows 7 to 9 acres a day... double disks 18 to 25 acres... plants 24 to 46 acres... cultivates 33 to 50 acres and, in later cultivations, 50 to 65 acres.

It handles every farm power job, including row-crop operations. Put the best tractor power to work now—at the new FARMALL price and on easy terms!

If it isn't a McCORMICK-DEERING, it isn't a FARMALL.
